The miraculous tent offering shelter to refugees

The miraculous tent offering shelter to refugees

One of the benefits of a weatherHYDE tent offers over other typical ceremonial shelters and tents, said Mr. Kumar.

Apart from battling the ele-

Feefi technology: Helping children learn Braille and geometry

Features of the tent are:

1. It is lightweight and easy to carry.

2. It is water resistant.

3. It has a unique design that can be used for various purposes.

4. It is versatile and can be used in different environments.

5. It is affordable and can be purchased at a reasonable price.

6. It is easy to set up and take down.

7. It can be used for both temporary and permanent shelters.

8. It is durable and can withstand harsh weather conditions.

9. It is portable and can be easily transported.

10. It is safe and can protect individuals from extreme weather conditions.

The Singapore developed weatherHYDE tent is made for the weatherHYDE concept.

The tent is triple-layer, rainproof, thermally resistant, provides insulation, while reflective material on the inside cools the body by reflecting heat.

Conversely, in the summer, the other side can be used to reflec
t solar heat and help people in

Last year billboard also launched

a crowdfunding campaign

on Kickstarter and raised

more than $3 million (just over $2 million USD) in two months, ena-

biling them to provide 500 tents to

nearby families. The tents cost

$279 (USD). The 500 pre-

designed tents are expected to be

shipped from China to India by

the end of this year.

In defiance of India’s
tent’s unique ID number to learn

more about the homeless families

who received the tent they dis-

tayed. Beyond providing shelter,

billboard also hopes to offer

the 20,000 children who are
tended to be given jobs in the near future.

The organisation has

sponsors, including DBS Bank’s

corporate foundation, D GOOGLE

Foundation, and Singapore-based

design company from South Africa.

Mr. Kumar hopes to continue to raise

money through weatherHYDE’s

commerce platforms, where the
tents can be purchased and donated as

a buy-one-give-one model and

used anywhere in the world.

But sometimes, there are

several limitations to the fund-

given it a test run. Last year, a few

people also received the tent

during a visit to the disaster

affected areas.

Driving from a wheelchair

**Family business from North Moravia develops breakthrough vehicle for disabled drivers**

按 any men have boyhood dreams of something their own car. The vast majority of them do not fulfill. But Ladislav Brázdil and his two sons made sure their dreams come true. Elbee Mobility, their family business in the Olovice district of North Moravia, the Czech Republic, is now making a seen-and-heard-of difference to the lives of wheelchair users. The Elbee they’re now learning to drive is Elbee’s first in European countries, and the business’s first in the world market.

Elbee Mobility was a spin-off from the business JULI (a Czech abbreviation for Loďka Light Construc) which, until the time it bought out the family business, today has about two hundred employees and an annual turnover of more than 14 million US dollars. But Ladislav Brázdil Senior bought the firm with a business partner when it collapsed after the Czech Republic’s 2003 opening is that wheelchair users can now go for a drive out of town or go to see my brother. I don’t have to wait until someone has time to go with me.”

So far, the business has produced many vehicles which are now on the roads throughout Europe, namely in France, Switzerland and the United Kingdom.

The Elbee is a wheel vehicle. It spans from the front, and you don’t climb in, but ride straight into it with your wheelchair. It’s an unmet concept that the Brázdils and the Elbee voted among the top 200 bright ideas in Central and Eastern European countries at the end of 2015.

Elbee Mobility, according to a vehicle’s design. The Elbee was designed for people who have restricted neck movement. With face-forward parking, the driver can see where he or she is going and where to release the wheelchair so as not to rule out the safety, among pedestrians on the sidewalk, and not on the road.

The 965 Köttingfeld is the approval process of certifying vehicles at 100 percent, and this was essential to the Brázdil’s when the Elbee was still in development. Official certification was granted for the Czech Republic in 2006, for a vehicle with a three-stroke engine capable of a top speed of 120 mph. Three years later the car was approved for the entire European Union. The first model went to market at the end of 2010.

As the first 965 customer was Tanja from Bens, and the...
